WORK EXPERIENCE

Mid-level/Intermediate Developer
Lhoopa Inc.

01/2023 - 06/2024 *Pasig City*

Duties & Responsibilities:
- Develop server-side data-driven applications which can serve dynamic pages and REST APIs.
- Develop interactive client-side applications for better user experience in terms of viewing different data from the backend.
- Work alongside developers, designers, and QAs to ensure application integrity, as well as maintainability.
- Write unit and feature tests and ensure code coverage to make sure all aspects of the application will not break upon updating.
- Maintain legacy codebases and monolithic applications that are currently used by the business process and refactoring for upgrading.

Entry-Level Web Developer
Prime Outsourcing Inc.

08/2022 - 01/2023 *Mandaluyong City*

Duties & Responsibilities:
- Develop websites and applications for in-house processes and clients.
- Learning different technologies and mastering the pros and cons of each technology.
- Applying all learned technology through creating several applications that will be deployed to production upon completion.
- Ensuring alignment in terms of Software Development Lifecycle and writing documentations on every step of the way of development.
- Work alongside junior developers and QAs to ensure code quality and application security.

SKILLS

Laravel TypeScript Vue.js Inertia.js
Tailwind CSS MySQL CodeIgniter React.js
Svelte RESTful API Git (GitHub/BitBucket)
Docker Linux Nginx Apache

ACCOMPLISHED PROJECTS

Lhoopa Kheops (07/2023)
- **Tech Stack:** Laravel 11, TypeScript, Vue 3, Inertia.js, Tailwind CSS.
- It has a custom-made SPA admin panel for managing users, properties, projects, and other entities related to real estate.
- Also includes the Backend API for the Lhoopa Mobile Application.
- **Notable features:** Modals, Maps, Data Tables, Advanced Forms, Geolocation, Geocoding.

Lhoopa App (07/2023)
- **Tech Stack:** React Native, TypeScript, Redux
- The official mobile application of Lhoopa, where clients, brokers, agents, contractors, and tipsters can manage and buy Lhoopa properties.
- **Notable features:** Forms, OAuth, Geolocation, Geocoding

Lhoopa Sourcing (06/2023 - 09/2023)
- **Tech Stack:** Laravel 10, TypeScript, Vue 3, Inertia.js, Tailwind CSS.
- It is a web application that uses our data from our sourced properties. This application is used by our Acquisition department to identify potential properties to be acquired and processed by our CRM system.
- **Notable features:** Charts, Maps, Data Tables, Advanced Forms.

Lhoopa Ticketing System (03/2023 - 06/2023)
- **Tech Stack:** Laravel 9, TypeScript, Vue 3, Inertia.js, Bootstrap.
- The support/ticketing system of Lhoopa Inc. which handles all related concerns to the company from clients and the employees themselves.
- This is a legacy system that is written in jQuery originally, but I rewritten it in Vue.js for it to become an SPA.
- **Notable features:** Single Page Application, Modals, Data Tables, Advanced Forms, Automations.

Lhoopa Cornerstone & CRM (01/2023 - Present)
- **Tech Stack:** CodeIgniter 3, jQuery, Bootstrap.
- These are the legacy in-house systems of Lhoopa Inc. which handles all necessary business operations and functions.
- I am mostly assigned to maintain and develop different features and improvements to these systems.
- **Notable features:** Data-driven Application, Maps, Advanced Forms, Automation, House Loan Application System, Inventory System, Collections & Payables System, Sales Transaction System, Construction System, Realty Locations Database.
